Front-end Developer

Frontend Developer with 2+ years of experience developing modern, responsive web applications using HTML5, CSS3, React.js, Next.js, Tailwind CSS, and JavaScript (ES6+). Strong expertise in component-based architecture, Redux, API integration, and performance optimization. Improved application test coverage from 85% to 95% by adding Jest test cases, enhancing reliability and performance. Skilled in AWS, Azure DevOps, CI/CD, and CMS platforms like Sanity. Experienced in Agile development and writing clean, scalable, maintainable code.

WORK EXPERIENCE

Mahindra & Mahindra Ltd • Mumbai • 12/2022 – Present

Frontend Developer

- Decreased the number of production rollbacks needed by 60% by refactoring unit tests using the Jest-based testing framework and AWS deployment pipelines, which improved software stability.
- Refactored and maintained front-end codebase using Next.js, Tailwind CSS, and SCSS, increasing elevated code quality and maintainability scores by 15% and reducing technical debt.
- Refactored project management frameworks by implementing daily stand-up meetings, which led to a measurable 15% boost in team code maintainability scores and increased developer satisfaction.
- Executed real-time data fetching from APIs within UI using Salesforce Lightning Web Components (LWC), enhancing user experience and improving data accuracy by 12% in Salesforce.
- Implemented the transition to Sanity CMS achieving a 17% increase in developer satisfaction by streamlining content integration and empowering them with intuitive content APIs.
- Integrated Power BI reports into Teams using React.js and access key.

AjackUS • Remote • 09/2022 – 11/2022

Software Development Intern

- I learned Next.js and Tailwind CSS framework to improve my skills from 25% to 85%, enabling me to perform in industry-level projects.
- Upgraded a SEO-friendly web application with Next.js and JSD, resulting in a 10-position boost in search engine rankings for targeted keywords and a 5% increase in organic traffic.
- Performed UI components using Next.js and Tailwind CSS, adhering to a reusable component architecture, enhanced code maintainability scores by 30% and component reusability by 40%.

EDUCATION

BCA in Computer Science and Engineering

Tilak Maharashtra Vidyapeeth • Mumbai • GPA: 7.4/10 • 06/2019 - 06/2022

Relevant Coursework: Object Oriented Programming, Databases, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks, and Information Retrieval. Additionally, I have learned React.js, HTML5, CSS3, and various other frameworks and libraries.

SKILLS

Programming: CSS3, HTML5, JavaScript(ES6+), Salesforce Apex, Salesforce Lightning WebComponents (LWC), Sanity CMS, SOQL Queries, TypeScript

Frameworks & Libraries: Axios APIs, Bootstrap 5, Formik Forms, React.js, React Native, Redux Toolkit, Sass (SCSS), Tailwind CSS

Testing: Jest JS React Testing Library

Back-End: Express.js, Firebase, MongoDB, Node.js

Tools: AWS, Azure, Figma, GitHub, Netlify, Postman, Salesforce Lightning Web Components LWC Studio, Vercel, Virtual control Git Bash, Visual Studio Code

PROJECTS

AI Content Generator – AI SaaS Website

- Spearheaded the development of a SaaS platform utilizing Next.js and a serverless architecture, which reduced infrastructure costs by 15% and enhanced application scalability by 20%.
- Designed and carried out a library of 10+ modular, reusable UI components in Next.js, accelerating feature development cycles by 15% and improving web application maintainability.
- Optimized custom UI components to comply with product design system specifications, enhancing consistency and reducing development errors.

Wishbin Store – E-commerce Website

- Built online store with Next.js, Sanity CMS, Stripe. Developed and maintained e-commerce workflows including product catalog management, shopping cart, and secure payment processing.
- Payment gateway Integrated Stripe API for secure credit card transactions.
- Sanity headless CMS. established schemas and queries to manage data.

PVR APP – Movie Application

- Mobile app for PVR Cinemas built with React Native and Expo.
- Developed user-friendly booking workflows and geolocation-based movie listings.
- Key Technologies: React Native, Expo, CSS3, JavaScript (ES6).
